Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Fig. 1, Fig. 2, Fig. 3, Fig. 4, Fig. 5, Fig. 6, Fig. 7, Fig. 8, Fig. 9.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. A telephone call was made to Adam Cermak on 02/09/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. In order to expedite the prosecution, the Examiner would like to bring to Applicant's attention that the following references appear to contain teachings that read directly on the present independent claims: Stettler 3969892, col. 6, ll. 12-18, and Wunning 5,154,599, claim 1, col. 14, l. 14 (although this value appears to be contrary to the teachings of col. 1, ll. 41, 52, 59, it is the claimed subject matter that matters in this case). Applicant is invited to consider these references, and either comment why the presently claimed subject matter defines over this prior art, or to amend the claims so that they will define over this prior art. The Examiner is particularly pointing out to the claimed " $r \leq 2$ " of Wunning and to the statement in Stettler "Typically, it is considered desirable that the amount of combustion products entrained by the air issuing from jet nozzle 55 be about twice the weight of the fresh air, this being defined as a recirculation ratio of two. In other words, for each pound of fresh air entering the combustion zone, two pounds of combustion products are recirculated to the entrance of 58." It is particularly the limitation "about" that makes this teaching reading on the present independent claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ehud Gartenberg whose telephone number is 571 272 4828. The examiner can normally be reached on Monday-Thursday.
